SURRENNE GOLD FACIAL: HYDRATE, ILLUMINATE, GLAM

(60 MINUTES / 90 MINUTES)
£250 / £330

Unlock the skin's natural powers of healing and rejuvenation. This groundbreaking treatment, combining four vital technologies — Oxygeneo, Tripollar RF, ESA and Ultrasound — offers immediate radiance to the complexion of the face, neck, and décolleté by replenishing oxygen and promoting renewal. Following a thorough consultation, the process is tailored to the individual skin-care requirements of every client and is boosted by the application of a specially developed Geneo Serum rich in essential Vitamins E and B, as well as Hyaluronic Acid.

SURRENNE DETOX: GREEN TEA FACIAL

(30 MINUTES) £160

Marnessing the well-documented and fortifying properties of the tea leaf at its most ripe, the Surrenne Detox Green Tea Facial was developed to boost the skin's ability to resist external stressors. Powerful antioxidants supplied by Copper Gluconate and Green Tea Extract are a first defence against the free radicals commonly found in urban environments. Further benefits of these properties include refining skin texture and lending a bright, more clarified appearance. The equivalent of drinking a daily cup of warm tea, the effect is one of balance, rejuvenation, and joy.

SURRENNE BALANCE: CHARCOAL FACIAL

(30 MINUTES) £160

For skin seeking equilibrium, and relief from the effects of excess oil, charcoal has been used for millennia as a curative friend. An abundant natural resource, the Bamboo strain found commonly in parts of East Asia is particularly effective at detoxifying and soothing the body's largest organ. Used here in combination with Camu-Camu extract, which is infused with vitamins and antioxidants, the effect is one of instant gratification and harmony. Skin enjoys a lasting, healthy appearance and is spared the worry of excess shine.

THE LYMA PRO FACIAL

(75 MINUTES) £250

Like a harmonious pas de deux, this treatment is a dance between LYMA's award-winning laser technology and the massage techniques of world-leading facialists. The result? Skin that's instantly firmed and fully refreshed. Once the skin is prepped, a stimulating hands-on massage with the low-level LYMA laser promptly lifts and sculpts the face. An oxygen-rich mask seals in the work while the massage moves onto the scalp, tension melting away with each touch. To finish, LYMA Serum and Cream is smoothed onto the face in gentle layers, the transformative power of epigenetic skincare fortifying the skin.

This is a particularly effective approach for those suffering from specific aches, pains, or ailments and seeking targeted treatment.

DOWNTIME

TIME TO PAUSE

THE RECOVERY RITUAL

TIME TO RESTORE

(60 MINUTES / 90 MINUTES)
£250 / £320

Inspired by restorative movement practices, this magnesium-infused bodywork treatment releases muscular tension, improves circulation, and restores fluidity of motion. A calming neck and scalp ritual with pulse-point application completes the experience, leaving the body grounded, supple, and renewed. The treatment offers an enhanced experience, incorporating a magnesium-rich foot soak and triple-action exfoliation, along with the signature banana stretch to encourage deeper mobility and release.

FOUR HANDS ULTIMATE SYNCHRONISED CEREMONY

(90 MINUTES) £540

The restorative power of touch is amplified in this transcendent treatment comprising simultaneous contact by two practitioners. Adaptogenics are naturally derived extracts utilised to reduce stress. Here they infuse light, aromatic oils whose purpose is to both relax the body and gently reinvigorate its energetic systems. A combination of light strokes and more concerted pressure soothes the muscles and fascia, resulting in the rebalance of both body and mind.
